Art Unit: 3611

1. Figures 9 and 10 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.121(d)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.
2. The incorporation of essential material in the specification by reference to a foreign application or patent, or to a publication is improper. Applicant is required to amend the disclosure to include the material incorporated by reference. The amendment must be accompanied by an affidavit or declaration executed by the applicant, or a practitioner representing the applicant, stating that the amendatory material consists of the same material incorporated by reference in the referencing application. See *In re Hawkins*, 486 F.2d 569, 179 USPQ 157 (CCPA 1973); *In re Hawkins*, 486 F.2d 579, 179 USPQ 163 (CCPA 1973); and *In re Hawkins*, 486 F.2d 577, 179 USPQ 167 (CCPA 1973).
3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
4. Claims 9, 14, 15 and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Mallette (CA 2,298,749).

Art Unit: 3611

In fig. 4, Mallette teaches a snowmobile having the structure as claimed. The device includes a slide rail 28, and extendible member 70, a front torque arm 30/84/80, a rear torque arm 40/50 and a shock absorber 60. It is noted that applicant discloses that the torque arms can refer to a combination of elements (spec, paragraph 36).

5. Claims 25-27 are rejected under 35 U.S.C. 102(b) as being anticipated by Boivin '264.

Boivin teaches a snowmobile having the structure as claimed. The device includes a slide rail 14, an extendable member (90 or 102), and torque arms 18/20. Various elements of the device define a quadrilateral shape.

6. Claims 25 and 26 are rejected under 35 U.S.C. 102(b) as being anticipated by Mallette '692.

Mallette teaches a snowmobile having the structure as claimed. The device includes a slide rail 22, an extendable member (the section between elements 28 and 29), and torque arms 24/25. Various elements of the device define a quadrilateral shape.

7. Claims 1-8, 17-24 and 28-39 are allowed.

8. Claims 10-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Mallette '124, Vaisanen, Karpik '706 and Karpik 191 disclose various devices having features in common with the instant invention.

Art Unit: 3611
